

A N D R E W D I N G

FULL - STACK WEB DEVELOPER

PROFILE

I am a full-stack web developer passionate about imagining then creating applications that are simple yet provide a great user experience. I enjoy the AHA moment when coding and immersing myself into many different web development technologies.

I feel very comfortable working in environments where I can fulfill many different roles and freely share my opinions with other coworkers.

I like to take my time in understanding businesses and their processes, but I am generally very fast in picking up new technologies and becoming proficient with them. Working in many different kinds of industries and companies has made me adaptable to many different kinds of environments as well as instilling a sense of fun in what I do.
